

## S.M. Bayne & Co Ltd Gender Pay Gap Report 2023

As a company we are committed to ensuring that everyone is treated equally, and in line with our core value of Respect. All employees, irrespective of gender, race, ethnicity or background, have the opportunity to develop. We are confident that our gender pay gap is not caused by men and women being paid differently to do the same job, but is determined instead by the structure of our workforce.

The data is based on 863 employees at the snapshot date 5th April 2023, of which 252 are men and 611 are women. This shows that in common with many other retail sector businesses, we employ many more women than men.

When looking at the pay differentials by quartile, the above table once again reflects our company workforce profile and the positive aspect of the high level of female employees in the upper middle and upper quartiles.

We are committed to working towards reducing our gender pay gap, and to develop our staff. I can confirm that the information within this report is accurate.
